DETAILED ACTION

This Office Action is in response to the Amendment filed on February 17, 2005.

Claim Rejections - 35 USC § 112

The rejection of Claims 13-16 via 35 U.S.C. 112, second paragraph, has been withdrawn pursuant to Applicant's arguments submitted on January 3, 2005.

Allowable Subject Matter

1. Claims 13-16 are allowed.
2. The following is an examiner's statement of reasons for allowance.

The prior art of record fails to teach or suggest, in combination with the other claimed features, wherein the horizontal protruding portion of the L-shaped upper spacer extending beyond the horizontal protruding portion of the L-shaped lower spacer; a high-concentration junction area formed to a first depth in the substrate beyond the L-shaped upper spacer; a low-concentration junction area formed to a third depth in the substrate under the horizontal protruding portion of the L-shaped upper spacer, the first depth being greater than the third depth; and a medium-concentration junction area formed to a second depth in the substrate and positioned between the high- and low-concentration junction areas and beyond the vertical sidewall portion of the L-shaped upper spacer, the second depth being between the first and third depths.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5,783,475 to Ramaswami teaches a horizontal protruding portion of an upper spacer extending beyond the horizontal protruding portion of the L-shaped lower spacer but fails to teach wherein the upper spacer is L-shaped or the formation of three concentration regions delineated by low/medium/high concentration areas.

6,013,569 to Lur et al. teaches a horizontal protruding portion of an upper spacer extending beyond the horizontal protruding portion of the L-shaped lower spacer but fails to teach wherein the upper spacer is L-shaped or the formation of three concentration regions delineated by low/medium/high concentration areas.
